**NUR 111**  
**Clinical Decision Making**

**Description:** This module introduces the concept of clinical decision making; emphasis is placed on problem solving, decision making, nursing process, and critical thinking.

**Learning Outcomes:**  
Upon completion of this module the student will be able to:  
- State the problem.  
- Identify the consequences of the problem.  
- Apply a systematic approach to the problem using the nursing process.  
- Analyze the data using critical thinking.  
- Evaluate the clinical decision making process.
