NUR 113  
Reproduction

Concept: Reproduction  
Exemplar: Prematurity

Description: This module introduces the concept of reproduction. Emphasis is placed on the exemplar “prematurity”, etiologic factors, special problems of the premature infant, common nursing diagnosis for the preterm infant and nursing care for each diagnosis.

Learning Outcomes: 
Upon completion of this module, the student will be able to: 
1. Discuss risk factors associated with prematurity. 
2. Relate the physiological impact of prematurity and complications associated with premature births. 
3. Compare/contrast the physical exam findings of a term infant and a premature infant. 
4. Identify common nursing diagnosis for premature infants. 
5. Use the nursing process to plan care for a premature infant.

Learning Resources: 

Websites: 

DVD/CD Rom’s: 

Learning Activities: 
1. Complete associated chapter in study guide. 
2. Complete/discuss case study on a premature infant. 
3. Complete 25 NCLEX-style questions related to prematurity. 

Evaluation: 
1. Unit tests 
2. Clinical performance evaluations
