NUR 212
Violence

**Description:** This model focuses on the concept of violence. Emphasis is placed on intimate partner abuse (IPA).

**Definition of concept:**

**Violence:** Communication or a behavior which threaten or demonstrates harm to self or others.

**Learning Outcomes:**
Upon completion of this module the student will be able to:

1. Present the incidence, etiology, epidemiology of Intimate Partner Abuse (IPA).
2. Determine assessment findings characteristic of both the victim and the victimizer in IPA.
3. Utilize informatics to access current best-practice for the care of the victim of IPA.
4. Demonstrate competency in performance of a client-centered assessment and related nursing care for the victim(s) of IPA.
5. Identify community resources indicated for and available to the victim of IPA.
6. Access current best-practice to determine the role of the nurse in primary, secondary and tertiary prevention of IPA.

**Learning Resources:**

OR

NC AND Textbook, Vol?, Chapter?

**Websites:**
http://www.ndvh.org/
http://www.spsdv.org/
http://crisis-support.org/

**Guest Speaker(s):** Local director of Women’s Shelter
Forensics Nurse from ED in local hospital
Legal representative for victims of domestic violence
and/or Local Law enforcement representative that deals with domestic violence

**Simulation scenario or case study related to IPA.**

**Learning Activities:**
Participate in case study/simulation scenario “Client that is a victim of IPA”.
Develop an assessment tool that could be utilized to interview a victim of IPA.
Develop a safety plan that includes the essential elements that would be indicated for a victim of IPA.
Create a teaching plan for or resource booklet/brochure that could be utilized in the community to include any resources available to victims of IPA.
Participate in the game “Victim or Victorimeter” (if we create such a game).
Demonstrate caring behaviors in the clinical setting when working with a victim or the family of the victim of IPA.

**Evaluation:**
Unit exam
Clinical Performance Evaluation
Peer/instructor feedback related to written assignments and case/simulation participation.
